BRIEF OVERVIEW / CAREER OBJECTIVE / SUMMARY

I have a knack for learning new and challenging things. I am a very good team player. I believe in mutual cooperation and learning while solving real world problems.

I want to join a business/technological institution which will give me experience of working on real life problems and also where I am able to be a part of something big and do good for the society.

Thus I will try my absolute best to fulfill the tasks given to me by my employer. I will also try to add value to my organization by giving my best opinion about an issue whenever asked for the same.

I hope to acquire roles in the organization I join where I will be able to excel my career and that is of course through guidance of my superiors. Hence I promise to be an added value to my organization.

KEY EXPERTISE / SKILLS

Web Development | Python | MySQL | AWS | Javascript | PHP | Html5 | CSS | JQuery | Database
